

Call for Participation

**1st FOKUS FUSECO Forum 2010
on Future Seamless Communication
October 14-15, 2010, Fraunhofer Institute FOKUS, Berlin, Germany
www.fuseco-forum.org**

**Business and Technical Challenges of Seamless Service Provision
in Converging Next Generation Fixed and Mobile Networks**

Hosted and organized by:

Fraunhofer Institute for Open Communication Systems FOKUS
Berlin, Germany on October 14 & 15, 2010

General Chair:

Prof. Dr. Thomas Magedanz, TU Berlin/Fraunhofer FOKUS

This interactive two day event represents a technologically focused follow-up to the famous [FOKUS IMS Workshop](#) series. IMS (IP Multimedia Subsystem) has united SIP (Session Initiation Protocol) based control in IP networks, EPC (Evolved Packet Core) has the potential to become the common control platform for any IP application. From the technical maturity and global recognition points of view, EPC stands today where IMS stood five years ago. Therefore it is the right time to launch a new workshop series to create global awareness in academia and industry. The new FOKUS FUSECO Forum is continuing the famous FOKUS IMS Workshop series by concentrating on a key enabling technology for future communication.

The first day starts with a tutorial about Long Term Evolution ([Berlin LTE-Advanced Testbed](#)) and the Open Evolved Packet Core ([OpenEPC](#)) and goes on with practical demonstrations from the Future Seamless Communication [FUSECO Playground](#).

An interesting [evening event](#) at Museum of Technology ([Deutsches Technikmuseum](#)) will allow participants to get together and discuss the challenges in the field of converging Next Generation of Fixed and Mobile Networks.

The second day features a highly interactive workshop with presentations from network operators and service providers. A vendor panel session and an associated exhibition will show the state of the art and upcoming products in this field.

Day 1 Thursday, Oct 14, 2010, 10:00-18:00 Tutorial	Permanent exhibitions & demos on both days	Day 2 Friday, Oct 15, 2010, 08:30-17:30 Workshop
Registration		Session 1
Tutorial part 1		Session 2
Lunch break featuring demos		Session 3
Tutorial part 2		Lunch break featuring demos
Social Event at Deutsches Technikmuseum more information		Session 4
		Session 5
	End of Forum	

This new FOKUS FUSECO Forum is continuing the famous FOKUS IMS Workshop series (www.fokus.fraunhofer.de/go/ims_ws_09) by concentrating on a key enabling technology for future communication and hence devoted to "Business and Technical Challenges of Seamless Service Provision in Converging Next Generation Fixed and Mobile Networks".

Register today to benefit from the early bird tariff (till September 1) at:
www.fuseco-forum.org/registration

=====

Please note that the FOKUS FUSECO Forum is part of a bigger event series, which we refer to as "Berlin Communications Week". Attendees of the FOKUS FUSECO Forum should be aware of the fact that prior to the FOKUS FUSECO Forum two additional related events are performed in close proximity in Berlin:

ICIN 2010

Weaving Applications into the Network Fabric

October 11-14, 2010, Berlin, Germany

www.icin.biz

FOKUS FUSECO Forum attendees benefit from a 15% discount on the registration fee there.

3rd Meeting of KuVS NG SDP Fachgespräch

on NG SDPs: "Towards SDPs for the Future Internet"

October 14, 2010, Deutsche Telekom Laboratories, Berlin, Germany

www.kuvs-ngsdp.org/3rd_meeting

Registration is free of charge.
